

LAB 7 REPORT

Name: Muhammad Sohaib

Reg No: 2026(S)CYS52

Lab Title: For Loop

Theory: A **for loop** in Python is used to repeat a block of code a specific number of times. It is commonly used to iterate (go through) items like lists, strings, or ranges. It helps reduce repeated code and makes programs shorter and easier to manage.

TASK 1

```
num=int(input("Enter a number:"))
for i in range(1,11):
    print(num*i)
```

Output:

```
Enter a number:5
5
10
15
20
25
30
35
40
45
50
```

TASK 2

```
for i in range(1,6):
    print(i*"*")
for j in range(4,0,-1):
    print(j*"*")
```

Output:

```
*
**
***
****
*****
*****
****
***
**
*
```

TASK 3

```
for i in range(10,0,-1):
    print(i)
```

Output:

```
10
9
8
7
6
5
4
3
2
1

Process finished with exit code 0
```

TASK 4

```
for i in range(1,10):  
    print(i**11)  
for j in range(10,0,-1):  
    print(j**11)
```

Output:

[illegible]
